

Animal Dental Training Center 2012 Course Listings

Course Title: [Clinical Advantage - Technicians Workshop](#) [top](#)

Dates: Saturday, and Sunday November 5-6 2011

Instructors: Dr. Ira Luskin Dipl. AVDC/EVDC, Dr. M.J. Redman, Dr. Mary Krakowski-Volker, Resident

Credits Earned: 16 hours

The participants at the end of this course will understand their integral role in the dental team and will be well versed in the following lecture topics:

- Normal Dental Anatomy
- Tooth development
- Eruption schedules
- Dental formulas of domestic animals
- Dental numbering system: Anatomic Vs. Triadan
- Positional terminology
- Malocclusions
- Periodontal disease: etiology, symptoms, stages and treatment options
- Oral radiographic pathology
- Radiographic theory of shooting

The laboratory component is 11 hours on cadavers and skulls and will include:

- Complete Dental Prophylaxis
- Dental Charting
- Instrument Care and Sharpening Techniques
- Radiology: Taking, Developing and Interpreting

Course Title: Oral Surgery 1, Oral Pathology, and Radiology | 3-Day Series [top](#)

Dates: Friday, Saturday, and Sunday December 9-11 2011

Instructors: Dr. Ira Luskin Dipl. AVDC/EVDC, Dr. M.J. Redman, Dr. Mary Krakowski-Volker, Resident

Credits Earned: 24 **RACE APPROVED** hours

Day#1 - Friday - Oral Pathology and Radiology: There will be 3.5 hours of lecture followed by a 4.5-hour laboratory. Lecture and Laboratory notes will be provided. The laboratory will be both on skulls and cadavers. The lecture will cover the following topics for both Veterinarian and Technician audiences:

- Origins of Oral Dental Disease Familial vs. Acquired Lesions
- Pathology of Tooth #'s, Form & Position
- Jaw Growth Abnormalities & Classification of Malocclusions
- Oral Soft Tissue Acquired Abnormalities
- Periodontal Disease, Trauma, Endodontic Disease
- Congenital and Neoplastic Disease

The Radiology laboratory section will cover:

- Dental radiology in your practice. Equipment / Materials
- Indications for radiology Normal vs. Abnormal
- Positioning for all standard views
- Developing and ID of normal vs. abnormal structures.

Day#2-3 - Saturday & Sunday - Oral Surgery 1: **Day 2:** There will be 3 hours of lecture followed by a 5-hour laboratory. **Day 3:** 2 hours of lecture followed by 6 hours of Lab. The lecture and laboratory notes will be provided. The laboratory portion will be conducted on both cat and dog cadaver heads. They will cover the following topics for a Veterinarian audience only:

- Indications for Exodontia
- Retained teeth, Intercepting Ortho, Impactions, Disarming, Treatment for LPGS in cats
- Instrumentation and Materials for Exodontia
- Procedures for surgical extractions
- Dealing with Complications of Surgery
- Maxillary Oronasal Fistula Closures
- Techniques for Muco-gingival Pedicle Flaps
- Rostral Mandibulectomies & Maxillectomies
- Jaw Fracture Repair

Course Title: Fundamentals Of Dentistry [top](#)

Dates: Saturday, and Sunday January 21-22 2012

Instructors: Dr. Ira Luskin Dipl. AVDC/EVDC, Dr. M.J. Redman, Dr. Mary Krakowski-Volker, Resident

Credits Earned: 16 hours

Day#1 - Saturday - The interactive morning lecture will cover clinical anatomy as it relates to oral health, disease and its treatment. The foundations of the dental exam, and oral prophylaxis for the treatment of periodontal disease will be thoroughly covered. In the afternoon the 4 hour wet lab will be on cadavers and will deal with the treatment of periodontal disease both conservatively and surgically:

- Normal dental anatomy
- Dental numbering system: Anatomic Vs. Triadan
- Positional terminology
- Malocclusions
- Periodontal disease: etiology, symptoms, stages and treatment options
- The thorough prophylaxis
- Proper use of Doxyrobe
- Surgical gingivectomies

Day#2 - Sunday Oral Pathology and Radiology: There will be 3.5 hours of lecture followed by a 4.5-hours laboratory. Lecture and Laboratory notes will be provided. The laboratory will be both on skulls and cadavers. The lecture will cover the following topics for both Veterinarian and Technician audiences:

- Origins of Oral Dental Disease Familial vs. Acquired Lesions
- Pathology of Tooth #s, Form & Position
- Jaw Growth Abnormalities & Classification of Malocclusions
- Oral Soft Tissue Acquired Abnormalities
- Periodontal Disease, Trauma, Endodontic Disease
- Congenital and Neoplastic Disease

The Radiology laboratory section will cover:

- Dental radiology in your practice. Equipment / Materials
- Indications for radiology Normal vs. Abnormal
- Positioning for all standard views
- Developing and ID of normal vs. abnormal structures.

Course Title: Oral Surgery 1, Oral Pathology, and Radiology | 3-Day Series [top](#)

Dates: Friday, Saturday, and Sunday February 10-12 2012

Instructors: Dr. Ira Luskin Dipl. AVDC/EVDC, Dr. M.J. Redman, Dr. Mary Krakowski-Volker, Resident

Credits Earned: 24 **RACE APPROVED** hours

Day#1 - Friday - Oral Pathology and Radiology: There will be 3.5 hours of lecture followed by a 4.5-hour laboratory. Lecture and Laboratory notes will be provided. The laboratory will be both on skulls and cadavers. The lecture will cover the following topics for both Veterinarian and Technician audiences:

- Origins of Oral Dental Disease Familial vs. Acquired Lesions
- Pathology of Tooth #'s, Form & Position
- Jaw Growth Abnormalities & Classification of Malocclusions
- Oral Soft Tissue Acquired Abnormalities
- Periodontal Disease, Trauma, Endodontic Disease
- Congenital and Neoplastic Disease

The Radiology laboratory section will cover:

- Dental radiology in your practice. Equipment / Materials
- Indications for radiology Normal vs. Abnormal
- Positioning for all standard views
- Developing and ID of normal vs. abnormal structures.

Day#2-3 - Saturday & Sunday - Oral Surgery 1: **Day 2:** There will be 3 hours of lecture followed by a 5-hour laboratory. **Day 3:** 2 hours of lecture followed by 6 hours of Lab. The lecture and laboratory notes will be provided. The laboratory portion will be conducted on both cat and dog cadaver heads. They will cover the following topics for a Veterinarian audience only:

- Indications for Exodontia
- Retained teeth, Intercepted Ortho, Impactions, Disarming, Treatment for LPGS in cats
- Instrumentation and Materials for Exodontia
- Procedures for surgical extractions
- Dealing with Complications of Surgery
- Maxillary Oronasal Fistula Closures
- Techniques for Muco-gingival Pedicle Flaps
- Rostral Mandibulectomies & Maxillectomies
- Jaw Fracture Repair

Course Title: Clinical Advantage - Technicians Workshop [top](#)

Dates: Saturday, and Sunday March 17-18 2012

Instructors: Dr. Ira Luskin Dipl. AVDC/EVDC, Dr. M.J. Redman, Dr. Mary Krakowski-Volker, Resident

Credits Earned: 16 hours

The participants at the end of this course will understand their integral role in the dental team and will be well versed in the following lecture topics:

- Normal Dental Anatomy
- Tooth development
- Eruption schedules
- Dental formulas of domestic animals
- Dental numbering system: Anatomic Vs. Triadan
- Positional terminology

- Radiographic theory of shooting

The laboratory component is 11 hours on cadavers and skulls and will include:

- Complete Dental Prophylaxis
- Dental Charting
- Instrument Care and Sharpening Techniques
- Radiology: Taking, Developing and Interpreting

Course Title: Discovering Dentistry (Oral Surgery 1 + Endodontics 1) [top](#)

Dates: Wednesday thru Sunday March 28 - April 1 2012

Instructors: Dr. Ira Luskin Dipl. AVDC/EVDC, Dr. M.J. Redman, Dr. Mary Krakowski-Volker, Resident

Credits Earned: 40 hours

One of the signature continuing education programs we offer, Discovering Dentistry combines **BOTH** our popular Oral Surgery and Endodontics disciplines into a single 40-credit block of time. This 5-day program has been specifically designed to immediately boost clinical productivity and maximize comprehension of subject matter through structured "real-world" cases and hands-on learning. Discovering Dentistry is geared towards beginner and intermediate level practitioners who are serious about taking their current dental practice to guaranteed new levels of success. The following topics in Dentistry and Oral Surgery are covered:

Day #1 - Wednesday - Oral Pathology and Radiology

There will be 3.5 hours of lecture followed by a 4.5-hour laboratory. Lecture and Laboratory notes will be provided. The laboratory will be both on skulls and cadavers. The lecture will cover the following topics for both Veterinarian and Technician audiences:

- Origins of Oral Dental Disease Familial vs. Acquired Lesions
- Pathology of Tooth #'s, Form & Position
- Jaw Growth Abnormalities & Classification of Malocclusions
- Oral Soft Tissue Acquired Abnormalities
- Periodontal Disease, Trauma, Endodontic Disease
- Congenital and Neoplastic Disease

The Radiology laboratory section will cover:

- Dental radiology in your practice. Equipment / Materials
- Indications for radiology Normal vs. Abnormal
- Positioning for all standard views
- Developing and ID of normal vs. abnormal structures.

Day# 2-3 - Thursday / Friday - Oral Surgery 1

Day 2: There will be 3 hours of lecture followed by a 5-hour laboratory. **Day 3:** 2 hours of lecture followed by 6 hours of Lab. The lecture and laboratory notes will be provided. The laboratory portion will be conducted on both cat and dog cadavers. They will cover the following topics for a Veterinarian audience only:

- Indications for Exodontia
- Retained teeth, Intercepted Ortho, Impactions, Disarming, Treatment for LPGS in cats
- Instrumentation and Materials for Exodontia
- Procedures for surgical extractions
- Dealing with Complications of Surgery
- Maxillary Oronasal Fistula Closures
- Techniques for Muco-gingival Pedicle Flaps
- Rostral Mandibulectomies & Maxillectomies
- Jaw Fracture Repair

Day# 4-5 - Saturday / Sunday - Endodontics 1

Day 4: There will be 3 hours of lecture followed by a 5-hour laboratory. **Day 5:** 2 hours of lecture followed by 6 hours of laboratory. 16 hours total. Notes for the lecture and lab will be provided. They will cover the following topics for a Veterinarian audience only:

- Indication for Vital Pulpectomies
- Techniques and procedures for their successful implementation
- Indications for Root Canal Therapy
- Equipment and materials required for root canal therapy
- Root canal access
- preparation and obturation techniques
- Restorative materials and their usages

Course Title: Oral Surgery 1, Oral Pathology, and Radiology | 3-Day Series [top](#)

Dates: Friday, Saturday, and Sunday April 20-22 2012

Instructors: Dr. Ira Luskin Dipl. AVDC/EVDC, Dr. M.J. Redman, Dr. Mary Krakowski-Volker, Resident

Credits Earned: 24 **RACE APPROVED** hours

Day#1 - Friday - Oral Pathology and Radiology: There will be 3.5 hours of lecture followed by a 4.5-hour laboratory. Lecture and Laboratory notes will be provided. The laboratory will be both on skulls and cadavers. The lecture will cover the following topics for both Veterinarian and Technician audiences:

Tuition for the courses are as follows:

Approaches to Veterinary Dentistry | 4-day Course - 32 credits - \$2400.00
Clinical Advantage: Technicians Workshop - 16 credits - \$775.00
Discovering Dentistry | 5-Day Course - 40 credits - \$2995.00
Endodontics 1, Oral Pathology and Radiology | 3-Day Course - 24 credits - \$1675.00
Exclusively Feline: Oral Surgery and Dentistry | 4-Day Course - 32 credits - \$2400.00
Fundamentals of Dentistry - 16 credits - \$1175.00
Masters/Advanced Courses - 16 credits - \$1395.00
Mock Exam - No Credit - \$1295.00
Oral Pathology and Radiology - 8 credits - \$475.00
Oral Surgery 1, Oral Pathology and Radiology | 3-Day Course - 24 credits - \$1575.00
Oral Surgery 2 - 16 credits - \$1195.00

All courses are limited enrollment; they include breakfast, lunch, refreshments and handouts. **A minimum of 10 registrants is required in order for the classes to be held.** Enrollment in a particular course is based on a first come first receipt of payment. If a payment is received and the course is already filled the applicant will be immediately notified. **We now accept MasterCard / Visa payments in addition to hospital checks made payable to the ADTC at our mailing address:**

Animal Dental Training Center [ADTC] Cancellation policy: in the event of a cancellation you may also send a substitute from your practice. Due to the limited number of spaces available requests for full refunds will be honored only if received at least 21 calendar days prior to the start of the program. A partial 75% refund will be issued for all requests received 8-20 days before the beginning of the course. No refunds will be granted for cancellations made less than 8 days prior to the course onset. All requests must be received in writing. In the unlikely event that a program is cancelled or postponed due to insufficient enrollments or unforeseen circumstances, the ADTC will fully refund registration fees but cannot be held responsible for any other expenses, including cancellation or change charges assessed by airlines, hotels, travel agencies, or other organizations.
